

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Have a look at the Activity Cards. Can you order them from the shortest time to the longest time? Stick the cards in the correct boxes.

shortest time

longest time

A large blue rectangular area containing a winding blue path. The path starts at the top left and ends at the bottom right. Along the path, there are 15 empty rectangular boxes, each intended for an activity card. The boxes are arranged in a zig-zag pattern: the first box is on the left, the second is in the top middle, the third is on the right, the fourth is on the left, the fifth is in the middle, the sixth is on the right, the seventh is on the left, the eighth is in the middle, the ninth is on the right, the tenth is on the left, the eleventh is in the middle, the twelfth is on the right, the thirteenth is on the left, the fourteenth is in the middle, and the fifteenth is on the right. The text 'shortest time' is written in blue at the top left of the path, and 'longest time' is written in blue at the bottom right of the path.

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Can you match each Action Card to the correct Duration Card to show how long you think each action takes. When you have finished, put them in order from shortest time to longest time.

shortest time

longest time

The main activity area is a light blue rounded rectangle. It contains a path of 12 cards, each divided into two horizontal sections. The path starts at the top left with the text 'shortest time' and ends at the bottom right with the text 'longest time'. The cards are connected by a thick blue line that winds through the path. The cards are arranged in a zig-zag pattern: Row 1 (left to right): Card 1, Card 2, Card 3; Row 2 (right to left): Card 4, Card 5, Card 6; Row 3 (left to right): Card 7, Card 8, Card 9; Row 4 (right to left): Card 10, Card 11, Card 12.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Have a look at the Action Cards and estimate how long you think each action would take. You can use seconds, minutes or hours for your estimates. When you have estimated the time, put them in order from shortest to longest, then check your estimates with a friend's estimates. Are they the same? Why or why not?

shortest time

[Empty box for time estimate]

longest time
